Материал 8. Скриншоты — проект QURT

Не менее 5 скриншотов; на каждом видны интерфейс AI-инструмента, промпт и результат. Номера совпадают с последним столбцом файла «07_Промпты_QURT». Файлы: 08_01, 08_02 и далее; сдаются одним PDF или архивом ZIP.

№ скриншота	AI-инструмент	Что должно быть видно	Строка в файле 07
08_01	Gemini	Промпт «Ты senior frontend-разработчик…» и ответ с кодом лендинга	1 (промпт № 1)
08_02	Gemini	Промпт «Front view studio product shot…» и сгенерированная лицевая сторона	2
08_03	Gemini	Промпт «Studio product mockup, flat straight-on back view…» и оборотная сторона	3
08_04	Gemini	Промпт «Create a high-resolution… enlarged QR code» и ранняя версия лицевой стороны	4 («нет»)
08_05	[указать]	Любой другой этап работы с AI: мокап на полке, доработка макета или тексты (промпт и результат)	[добавить строку в 07]

Промпт (Gemini)

Front view studio product shot of a royal blue (`#0861C6`) matte stand-up doypack snack pouch on a neutral light-gray background. The blue pouch is decorated with subtle tone-on-tone Kazakh swirling ornament patterns. Along the bottom edge and corners is a distinct cream-white geometric Kazakh maze border. In the upper-left corner is a white rectangular label tag with a blue mountain emblem. Across the upper part is giant, bold, tall white block typography spelling "QURT". Directly beneath it is a cream-colored ribbon banner with text "ҚҰРТ ЫСТАЛҒАН" and "КУРТ КОПЧЁНЫЙ". In the center is a large round transparent window displaying golden-brown textured smoked curd balls (qurt). On the left and right sides of the round window are two circular craft stamp badges with red icons. At the bottom center is a framed label reading "Таза салмағы 100 г / Масса нетто 100 г". In the bottom-right corner is a clean blank square box for a QR code. Sharp focus, clean commercial FMCG packaging mockup, 8k

Промпт (Gemini)

Studio product mockup, flat straight-on back view of a food stand-up pouch (doypack packaging) for traditional dry cheese snack. The pouch body is vibrant bright royal cobalt blue (`#0861C6`), matching the exact bright blue color and lighting of the front package, decorated with soft tone-on-tone Kazakh ornamental wave patterns (`#A4CFFF`). Along the very bottom edge is a cream-colored traditional Kazakh geometric maze border. Completely remove and do not include any QR codes. The back layout features clean, elegant off-white (`#FCF8F3`) and cream rectangular modular infoboxes with thin borders: at the top, a neat promo rules banner with a small gift box icon and space for text (strictly NO QR code); in the middle, organized rectangular cards for dairy nutrition facts table, bilingual ingredients, storage conditions, and manufacturer details; at the bottom, an EAN-13 barcode box, EAC mark, KZ quality mark, recycling icons, and an empty white box for the batch date stamp. At the top of the po

Результат — оборотная сторона упаковки

Промпт (Gemini)

Create a high-resolution, photorealistic studio product photograph of a single standing resealable doypack pouch containing traditional Kazakh kurt (QURT). The pouch is centered against a clean, pale gray-white background with soft natural shadows and premium commercial product photography.
Packaging design:
- Deep cobalt-blue packaging with a premium matte finish.
- Elegant Central Asian ornamental patterns in cream and light blue, featuring flowing decorative flourishes along the sides and traditional geometric Kazakh motifs along the bottom.
- A small white manufacturer logo panel in the upper-left corner.
- Large, embossed cream-colored “QURT” lettering in an elegant serif typeface.
- A blue ribbon beneath the title with the text “ҚҰРТ ЫСТАЛҒАН” and “ҚҰРТ КОПЧЁНЫЙ”.
- A circular transparent product window displaying realistic, naturally textured kurt balls in golden-brown and light beige shades.
- A decorative cream-colored label near the bottom reading “Таза салмағы: 100 г” and “Масса нетто: 100 г”.
Main modification — enlarged QR code:
Make the QR code in the lower-right corner of the packaging approximately 1.5–2 times larger than in the original design. It must be prominent, clearly visible, sharp, and square, with dark blue QR modules on a white background and a clean white border. The QR code should occupy a substantial portion of the lower-right section of the pouch without overlapping the weight label. Preserve the surrounding ornamental patterns while adjusting the layout to accommodate the larger QR code.
Visual style and composition:
- Premium contemporary food packaging design.
- Subtle Kazakh cultural identity integrated into a modern aesthetic without overwhelming the overall design.
- Realistic flexible packaging material with detailed printing and crisp edges.
- Straight-on frontal camera angle.
- Soft, professional studio lighting with natural shadows.
- Clean, light gray-white background.
- Ultra-realistic commercial product photography.
- 4K resolution, square 1:1 aspect ratio.
- The entire pouch must be visible, centered, and vertically aligned.
Important constraints: Keep the original overall design, color palette, typography, product window, and layout consistent. The primary change is the larger QR code. Do not add extra objects, additional packages, unnecessary decorations, or unrelated graphic elements.
Note: If the QR code must be scannable, insert a real QR code during post-production, as AI image generators may produce visually convincing but non-functional QR patterns.

Результат — ранняя версия лицевой стороны

Промпт (Gemini)

Create a highly realistic, professional product packaging mockup for Gormolzavod Kokshetau, a Kazakhstani dairy producer, featuring traditional smoked qurt.
Show the FRONT and BACK of the same stand-up resealable doypack side by side in a clean studio setting, against a light neutral background. The packaging should look physically realistic, with subtle material texture, natural folds, zipper seams, soft studio lighting, and realistic shadows.
COLOR PALETTE
Use a rich, vivid royal blue and warm ivory cream as the dominant colors. Maintain a strong contrast between the two. Do not introduce unrelated colors or change the established palette.
FRONT DESIGN
* Place the authentic Gormolzavod Kokshetau logo prominently near the upper center.
* Use oversized, bold, cream-colored Cyrillic typography reading “ҚҰРТ”.
* Under the main title, include “ЫСТАЛҒАН / КУРТ КОПЧЁНЫЙ” in a clean, modern sans-serif font.
* Include small bilingual product descriptions and simple line icons for natural product, no preservatives, and high protein content.
* Place “МАССА НЕТТО 100 г” near the bottom.
* Feature a large, realistic photograph of golden-brown smoked qurt balls with detailed, naturally wrinkled surfaces. The product photograph occupies the lower-right portion of the package and is integrated into an asymmetrical cream-and-blue composition.
* Add a clearly defined, empty cream-colored square reserved for a QR code near the lower-right corner.
* Keep the design premium, bold, appetizing, and easy to recognize from a distance.
BACK DESIGN
* Use the same royal-blue and ivory palette.
* Place the authentic Gormolzavod logo near the top.
* Organize bilingual product information into clean, well-aligned sections with thin blue dividers.
* Include product name, ingredients, nutritional information per 100 g, storage conditions, shelf life, manufacturer information, contact details, barcode, regulatory symbols, recycling symbols, and blank production date and batch number fields.
* Include a promotional panel with a gift icon and a clearly reserved QR-code area.
* Use consistent typography, comfortable spacing, and a clear information hierarchy.
DESIGN STYLE
Contemporary commercial food packaging, bold editorial typography, asymmetrical composition, realistic food photography, clean vector graphics, precise alignment, premium retail presentation, professional packaging design, photorealistic mockup, high detail.
Avoid excessive decoration, unnecessary gradients, cluttered text, distorted logos, and artificial-looking product photography.

Результат — ранняя версия обратной стороны
